

## Year 12 Product Design Summer Task 2021

**Task: You must find and identify a problem, which needs to be solved.**

This summer task will help you with your Year 12 coursework.

Previous students' examples:

- A 'Hot Desk' briefcase. This enables someone to have a working desk wherever they choose to work.
- A self-watering plant pot. Which solves the problem of who will water the plants whilst you are on holiday.
- A gadget caddy. A place to store all of your electronic gadgets and wires that lay around your room and cause clutter.

You should:

- Take photographs of the problem, which needs to be solved.
- Find a client who you plan to design for and interview them.
- Analyse your photographs and interview. Discuss what the problem is that you have identified. Discuss potential ways in which you could research this problem and potential ideas for solving the problem.

**If you have any questions, please email [stephen.walker@davenant.org](mailto:stephen.walker@davenant.org)**
